

TANK MODULE.

Part No
23408

TECHNICAL DATA

TANK MODULE.

Has four connections for controlling air solenoid valves to start and stop the pumps and can also work together with a low level or low and re-order level sensor. It is equipped with a key switch with normal operation, emergency override and On/Off functions. Controls waste oil solenoid valves plus the re-order warning on the PC. This module only works together with PC software 23414. 230-240 V AC power supply required

TECHNICAL DATA

Part No	23408
Voltage	230 V DC
Power consumption	0,8 A
H.S. Code	84715000
