## TECHNICAL DATA

### SUCTION UNIT CE 5F-450 WITH FREQUENCY CONVERTER.

Dust removal takes place in two steps: coarse separation in cyclone and fine separation in a pleated 7.5 m<sup>2</sup> conical cartridge filter. Efficient automatic filter cleaning guarantees good suction capacity even at high dust loads. The control cabinet has a starter and built-in functions for start / stop and filter cleaning as well as terminal connection for external start. The suction vent must be extracted through the facade, not to the ventilation of the house.
