

SUCTION STRAINER TO BE CONNECTED BETWEEN THE HOSE REEL

Part No
29312

TECHNICAL DATA

SUCTION STRAINER TO BE CONNECTED BETWEEN THE HOSE REEL

And the suction hose, to prevent contamination to the hose and pump. The polypropylene strainer housing is resistant to most fluids used in a modern car workshop and equipped with a 32 mesh stainless steel filter cartridge. (Equivalent to ~0.6 mm² perforations). The filtration is sufficient to prevent harmful particles from entering the pump and the washable strainer should be cleaned regularly to remove any contamination.
