TECHNICAL DATA

SUCTION UNIT CE 7F-450

Dust removal takes place in two steps: coarse separation in cyclone and fine separation in a pleated 7.5 m² conical cartridge filter. Efficient automatic filter cleaning guarantees good suction capacity even at high dust loads. The control cabinet has a starter and built-in functions for start / stop and filter cleaning as well as terminal connection for external start. The suction vent must be extracted through the facade, not to the ventilation of the house.

Recommended simultaneous use

Detailing bay: 2-3 users

Collision repair: 4-5 users
