Request

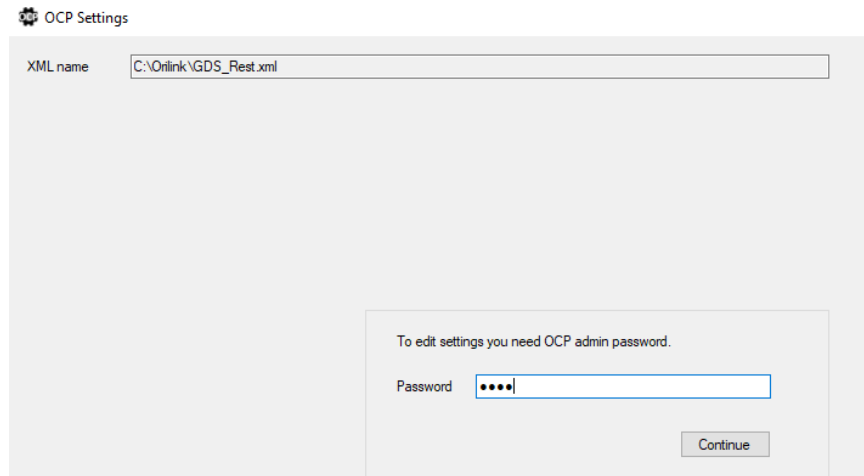

Password used for accessing GDS Rest WebService needs to be changed every 180 day according to Volvo instructions.

Solution

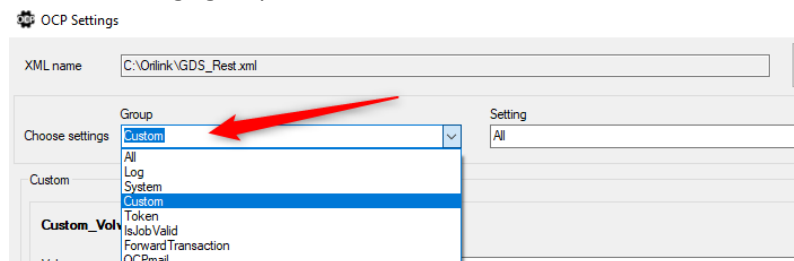

1. Change password in Volvo program, contact DSC support dsc.nordic@volvo.com for new password (can be different if not a Scandinavian Country).
2. Open c:\OriLink folder on oil computer.
3. Run program OCPSettings.exe (this program needs to be added as trusted if security settings on oil computer is set to not accept any new exe programs).

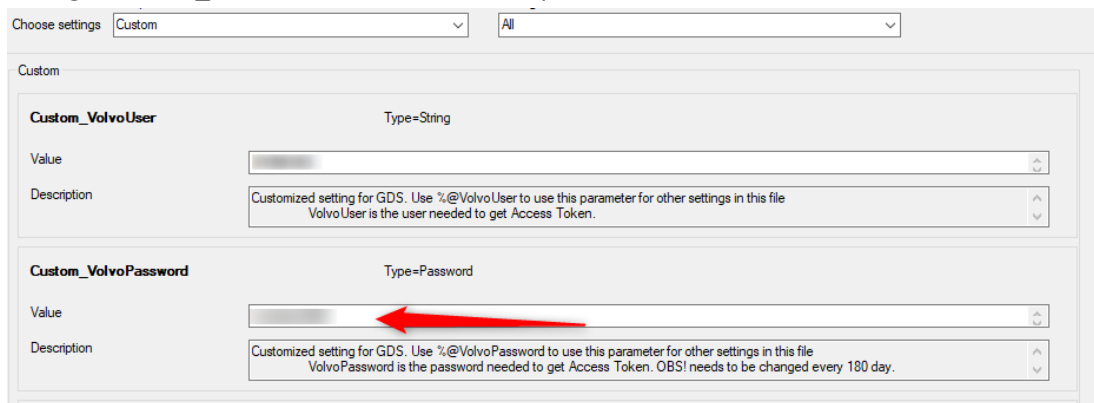

4. Password for OCP settings is 2222.

5. Choose settings group "Custom".

- Change **Custom_VolvoPassword** to the new password.

Choose settings: Custom | All

Custom

Custom_VolvoUser Type=String

Value: [Redacted]

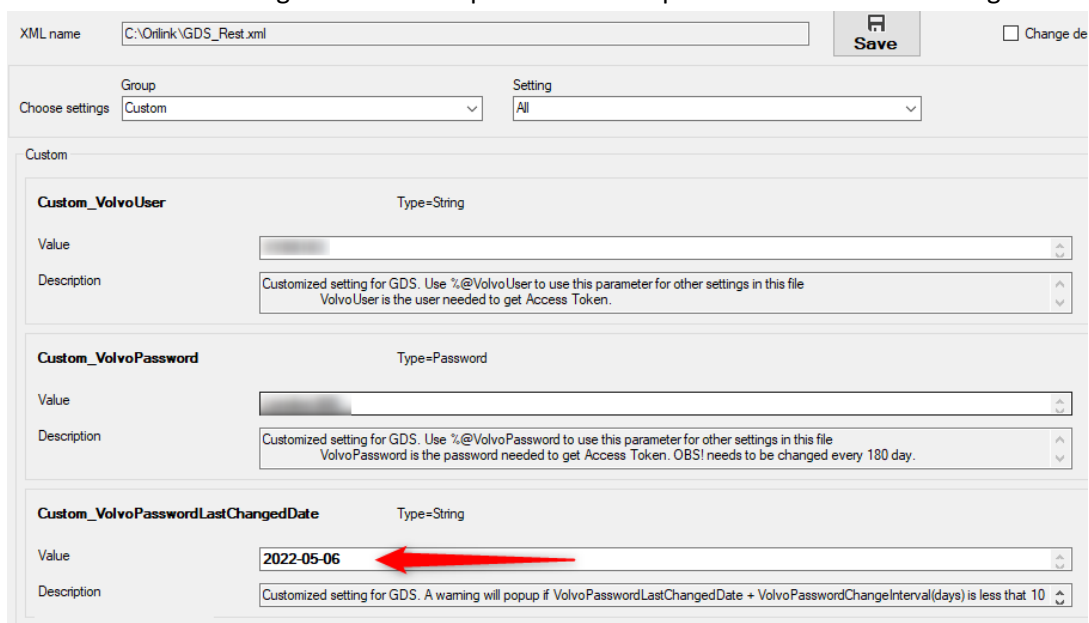

Description: Customized setting for GDS. Use %@VolvoUser to use this parameter for other settings in this file. VolvoUser is the user needed to get Access Token.

Custom_VolvoPassword Type=Password

Value: [Redacted] 

Description: Customized setting for GDS. Use %@VolvoPassword to use this parameter for other settings in this file. VolvoPassword is the password needed to get Access Token. OBS! needs to be changed every 180 day.

- Change **Custom_VovloPasswordLastChangedDate** to today's date (format yyyy-MM-dd). This Date will be used to show a warning on the oil-computer next time password needs to be changed.
