

HAND OPERATED DIAPHRAGM PUMP

The manual diaphragm pump is a lever-activated pump that is very useful in numerous liquid transfer operations.

It has a low weight and high chemical compatibility.

The pump can be used on drums (with a drum adaptor kit, included in 21221) or wall-mounted. These features make it extremely versatile and adaptable in numerous fields of application, such as building, agriculture, industry, transport, heating, sailing, car repairs etc.

A wide range of liquids can be decanted, such as: water, seawater, diesel, mineral and synthetic oil, engine oil; glycol (antifreeze); kerosene; heating oil; emulsions and liquids with small solid bodies.

	Part No	Description	Connection	Capacity	Packing
	21220	Bare pump	Ø 25 mm	25 litres/ min	cm 20x25x20 0,6 kg
	21221	Complete pump w accessories		25 litres/ min	cm 40x40x15 2,9 kg
